Vortex Ecosystem

Product Features

Borrow

The platform makes it easy to borrow crypto assets using your collateral.

Insured

Get covered against smart contract failure and hedge your risk.

Lend & Earn

Deposit your crypto assets and earn the most optimised interest rate.

Non-Custodial

No one else can access your funds as assets are stored on a contract wallet.

Swap

Swap assets in an instant with liquidity from multiple decentralised exchanges.

Asset Management

Single user interface for all DeFi needs to avoid the hassle of huge UI learning curve.

Frequently Asked Questions

Can't find the solution to your query? [Contact us](#)

Is Vortex available in my country?

You can access Vortex from anywhere in the world.

Who keeps the custody of assets?

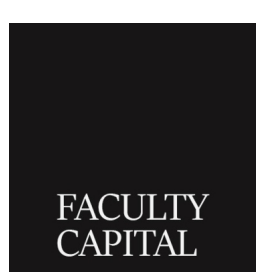

We do not hold any of your assets. A smart contract secures your transactions and stores your assets on a contract wallet. You can view everything publicly on the ethereum blockchain.

How can I connect with the team?

Reach out to us via Telegram, Twitter, or Mail.

Partners & Investors

We are partnered with leading blockchain companies for building a suite of tools, accessing multi-chains under one roof.

About Us

Leadership

As a startup, everyone wears many hats. We value new ideas and support our employees from idea generation to implementation.

Professional Development
